DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-8, 10-19 and 21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kendall (US 2006/0156332 A1) in view of Ganzer et al (US Patent 5,121,430). Hereinafter referred as Kendal and Ganzer.

Regarding claims 1, 10, and 19, Kendall discloses an apparatus and method having an emergency alert function (**Emergency Alert Function (305) in figure 3**), comprising: tuning means for tuning signals including emergency alert signals associated with said emergency alert function (**Tuner (22) in figure 2**); and processing means for enabling a disabled user setting for an auxiliary information display function of said apparatus responsive to said emergency alert signals. **However, Kendal fails to disclose** the use of enabling a disabled apparatus. Ganzer discloses (**column 11 lines 3-11**) the slave unit (85) may output control signals to control the functioning of accessory devices (96) in response to an emergency.

Therefore, it would have been obvious at the time of the invention to include the use of a control function to control devices triggered by an emergency unit. This is a

useful combination because it allows devices to be turned on or off in case of an emergency.

Regarding claims 2, 11, and 20, Ganzer discloses the apparatus and method of claims 1, 10, and 19, wherein said disabled audio output device includes an internal speaker of said apparatus (**Speaker (71) in figure 3**).

Regarding claims 3, 12, and 21, Ganzer discloses the apparatus and method of claims 1, 10, and 19, wherein said disabled audio output device is operatively connected to an audio output terminal of said apparatus (**Audio Toggle (69) in figure 3**).

Regarding claims 4, 13, and 22, Ganzer discloses the apparatus and method of claims 1, 10, and 19, wherein said processing means further enables a first alert output via said audio output device responsive to activation of said emergency alert function (**Alternative Broadcast Signal Input Circuitry (53) in figure 3**).

Regarding claims 5, 14, and 23, Ganzer discloses the apparatus and method of claims 4, 13, and 22, wherein said processing means further enables a second alert output via a secondary device responsive to activation of said emergency alert function (**User Set Alternative Alert Select (58) in figure 3**).

Regarding claims 6, 15, and 24, Ganzer discloses the apparatus and method of claims 5, 14, and 23, wherein said secondary device includes a telephone (**column 3 lines 21**).

Regarding claims 7, 16, and 25, Ganzer discloses the apparatus and method of claims 5, 14, and 23, wherein said secondary device includes a computer **(Alert Computer (11) in figure 2)**.

Regarding claims 8, 17, and 26, Kendall discloses the apparatus and method of claims 5, 14, and 23, wherein said secondary device includes a television signal receiver **(Display (29) in figure 2)**.

Regarding claims 9, 18, and 27, Ganzer discloses the apparatus and method of claims 5, 14, and 23, wherein said secondary device includes a visual output device **(Alarm (6) in figure 1)**.
